

STATE OF OKLAHOMA  
DEPARTMENT OF HIGHWAYS  
SURVEY DIVISION

FLOOD INFORMATION FORM

To be used in obtaining and transmitting flood water elevations for Survey Division office record files. This information to be obtained by all Chiefs of Party or others in their vicinity in times of unusual high water, or at any time available from a reliable source. The elevations can be recorded by level reading, by measurement from bridge floor, in relation to a house, above roadbed or any other dependable, clear manner that fits the situation, the highest order possible to be used. Separate report to be made on each crossing or place obtained.

County Alfalfa Date highwater occurred 8/15/1932

Elevation 1182.8 Source of levels USO&GS

Method obtained Wye Level Date obtained July 24, 1963

Did it appear to be  normal  medium  extreme  do not know

Was highwater mark obtained from actual water, drift, local resident, U. S. Engineers, etc.? Local Resident Mr. C. H. McDonald. North Grand Ave. Cherokee.

Mr. McDonald was working in the light and water plant at the time of the actual highwater, who reported to me in person that the water was 1.5 Ft. deep in the light plant.

Explanatory Remarks This highwater was caused from overflow from cottonwood creek which is  $\frac{1}{2}$  block north. Also from local water from the downpour.

Location to be shown on back of this sheet as a check.
