

STATE OF OKLAHOMA
DEPARTMENT OF HIGHWAYS
SURVEY DIVISION

FLOOD INFORMATION FORM

To be used in obtaining and transmitting flood water elevations for Survey Division office record files. This information to be obtained by all Chiefs of Party or others in their vicinity in times of unusual high water, or at any time available from a reliable source. The elevations can be recorded by level reading, by measurement from bridge floor, in relation to a house, above roadbed or any other dependable, clear manner that fits the situation, the highest order possible to be used. Separate report to be made on each crossing or place obtained.

County Alfalfa Date highwater occurred June 23, 1963

Highway number SH 45 Name of stream _____

Direction and distance from nearest town, village or store East Edge of Carmen, Okla

Section, Township and Range Sec 2 T24N R12W

about 600 Ft. East of the AT&SF Depot in Carmen, Oklahoma
On SH 45

Elevation 1335.59 Source of levels USC&GS

Method obtained Wye Level Date obtained June 24, 1963

Did it appear to be normal medium extreme do not know

Was highwater mark obtained from actual water, drift, local resident, U. S. Engineers, etc.? Obtained from drift on the hand rail of bridge and from silt on SH 45 about 150Ft. East of the Bridge, also from local resident Mr. Floyd Strate Carmen, Okla

Explanatory Remarks There was a drift on the upstream handrail of this bridge showing the water to be 2.0 Ft. deep over the floor of the bridge.
This highwater was caused by a reported 9-12 inch rain that fell in a six hour period.

Location to be shown on back of this sheet as a check.
