

STATE OF OKLAHOMA
DEPARTMENT OF HIGHWAYS
SURVEY DIVISION

FLOOD INFORMATION FORM

To be used in obtaining and transmitting flood water elevations for Survey Division office record files. This information to be obtained by all Chiefs of Party or others in their vicinity in times of unusual high water, or at any time available from a reliable source. The elevations can be recorded by level reading, by measurement from bridge floor, in relation to a house, above roadbed or any other dependable, clear manner that fits the situation, the highest order possible to be used. Separate report to be made on each crossing or place obtained.

County Alfalfa Date highwater occurred June 23, 1963

Highway number US 64 Name of stream _____

Direction and distance from nearest town, village or store In Cherokee, Oklahoma

Section, Township and Range Sec 2 T26N R11W

Description of Location At City Hall In Cherokee. At Grand Ave. and Washington St.

Elevation obtained 50 Ft. Lt. of Station 389+00 SWO 2568(1)

Elevation 1179.35 Source of levels USC&GS

Method obtained Wye Level Date obtained June 24, 1963

Did it appear to be normal medium extreme do not know

Was highwater mark obtained from actual water, drift, local resident, U. S. Engineers, etc.? From water mark and local resident Mr. Don Groves City Mgr. of Cherokee, Oklahoma-Residence 608 South Penn St. Cherokee

Explanatory Remarks Water was 0.5 Ft. deep in City hall. There was a water mark on the Northeast corner of the Bldg showing the water to have been at the elevation reported to me by Mr. Groves.

This highwater was caused by a reported 9-12 Inch rain which fell in a Six hour period. This highwater is not as high as it was in 1932. This Highwater was caused from local water and not from overflow from cottonwood creek

Location to be shown on back of this sheet as a check.
