If you need to save or print the form, of if you need to use the form where there is no Internet access:

You may use a portable and saveable pdf version of the Flood Information Form available at http://54.221.221.214/dbflood/ODOT_FloodInformationForm.pdf. However, please be aware that the portable form does not support attachments. If you have no attachments, you may simply use the Submit button when you have Internet access. If you would like to include attachments, please complete your form, save it, rename it (see instructions below), and email it (with any attachments) to wtackett@odot.org and sjsmith@usgs.gov. The emailed form and attachments will become the permanent records on file at ODOT. Please use the following format when naming the files:

County-IndexNumber-YourEmail-DateOfHighwater

The Index Number (Example: 0001) can be any number; its purpose is to make the filename unique for highwater measurements made on the same day in the same county. For attachments (such as digital photos or scanned map drawings), use the same naming format and index number but add a letter after the index number.

Example filenames for a flood survey form with two photo attachments: Pittsburg-0004-John.Smith@company.com-20140625.pdf Pittsburg-0004a-John.Smith@company.com-20140625.jpg Pittsburg-0004b-John.Smith@company.com-20140625.jpg

Thank you for using the new digital version of the ODOT Flood Information Form 16!
