FLOOD INFORMATION FORM

To be used in obtaining and transmitting flood water elevations for Plans & Survey office record files. This information to be obtained by all Chiefs of Party in their vicinity in times of unusual high water, or at any time available from a reliable source. The elevations can be recorded by level reading, by measurement from bridge floor, in relation to a house, above roadbed or any other dependable, clear manner that fits the situation, the highest order possible to be used. Separate report to be made on each crossing or place obtained.

County Caddo ✓ Date highwater occurred April 5, 1957

Highway number US 281 Name of stream Washita River

Direction and distance from nearest town, village or store Bridge is being built near the north city Limits of Anadarko.

Section, Township and Range Section 15, T7N, R10W

Description of Location At the site of the New Washita River Bridge now being built under F.A.P. No. F-351 (1).

Method obtained Level & Level Rod

Elevation 1166.80 Source of levels B.M. from F.A.P No. F-351 (1) Plans.

Was highwater mark obtained from actual water, drift, local resident, U. S. Engineers, etc? Actual Water

Explanatory Remarks This is not extreme high water but is about normal high water according to local residents. This high water was not caused from local rains but from rains further up the River.

Location to be shown on back of this sheet as a check.

Field Note: To be sent to Engr. of Plans & Survey (1 copy).
Office Note: To be filed in Flood Information by Counties.
