

Plans & Survey Dept.
Form No. 16
Rev. July 10, 1947

STATE OF OKLAHOMA
DEPARTMENT OF HIGHWAYS
PLANS AND SURVEY DEPARTMENT

FLOOD INFORMATION FORM

To be used in obtaining and transmitting flood water elevations for Plans & Survey office record files. This information to be obtained by all Chiefs of Party in their vicinity in times of unusual high water, or at any time available from a reliable source. The elevations can be recorded by level reading, by measurement from bridge floor, in relation to a house, above roadbed or any other dependable, clear manner that fits the situation, the highest order possible to be used. Separate report to be made on each crossing or place obtained.

County Carter Date highwater occurred May 11-12-1950

Highway number SH#18 Name of stream Washita River

Direction and distance from nearest town, village or store 3 1/2 mi. north of Dickson
which is on US#70 approx. 10 mi. east of Ardmore

Section, Township and Range _____

Description of Location at beginning of F 352(1)

Method obtained Measured with rule during high water

Elevation Water level was 40 1/8 " below top of wood floor on south approach span
Source of levels _____

Was highwater mark obtained from actual water, drift, local resident, U. S. Engineers, etc? Actual water

Explanatory Remarks I was informed by man who lives on south bank that the Army

Engineer gage read 42.55 and that during a flood several /years back that the water came up
thru the cracks between the wood floor planking; in other words that the previous
high water was 2.5' to 3' higher than the 1950 flood.

Location to be shown on back of this sheet as a check.

Field Note: To be sent to Engr.
of Plans & Survey (1 copy).
Office Note: To be filed in Flood
Information by Counties.

W. H. Jones
