STATE OF OKLAHOMA
DEPARTMENT OF HIGHWAYS
PLANS AND SURVEY DEPARTMENT

FLOOD INFORMATION FORM

To be used in obtaining and transmitting flood water elevations for Plans & Survey office record files. This information to be obtained by all Chiefs of Party in their vicinity in times of unusual high water, or at any time available from a reliable source. The elevations can be recorded by level reading, by measurement from bridge floor, in relation to a house, above roadbed or any other dependable, clear manner that fits the situation, the highest order possible to be used. Separate report to be made on each crossing or place obtained.

County Carter Date highwater occurred May 18, 1957

Highway number HS 70 Name of stream Walnut (Bayou) Creek

Direction and distance from nearest town, village or store 3 miles east of Ilson

Section, Township and Range Sec. 24 & 200, 35, T42, R22

Description of Location Measured on steel I-beams on main bridge & reinforcement at Sta. 575 & Sta. 579 F.P. 575

Method obtained 826.0 Bridge Floor

Elevation 826.0 ← Source of levels Bridge floor present bridges

Was highwater mark obtained from actual water, drift, local resident, U. S. Engineers, etc? drift & oil line on I-beams of both bridges

Explanatory Remarks One oil tanker above the highway floated, tipped over and emptied crude oil into stream providing a very definite HW line on bridges and over land & trees.

Location to be shown on back of this sheet as a check.

Field Note: To be sent to Engr. of Plans & Survey (1 copy).
Office Note: To be filed in Flood Information by Counties.
