

STATE OF OKLAHOMA
DEPARTMENT OF HIGHWAYS
SURVEY DIVISION

Survey Division
Form No. 16
Rev. Dec. 2, 1974

FLOOD INFORMATION FORM

To be used in obtaining and transmitting flood water elevations for Survey Division office record files. This information to be obtained by all Chiefs of Party or others in their vicinity in times of unusual high water, or at any time available from a reliable source. The elevations can be recorded by level reading, by measurement from bridge floor, in relation to a house, above roadbed or any other dependable, clear manner that fits the situation, the highest order possible to be used. Separate report to be made on each crossing or place obtained.

County Cherokee Date highwater occurred October 1, 1986

Highway number SH 80 Name of stream Ranger Creek

Direction and distance from nearest town, village or store approx 1 mile north and 1.7 mile west of the Norwood School House.

Section, Township and Range Section 9, T16N, Range 20E.

Description of Location SH 80 crossing of Ranger Creek.

Elevation _____ Source of levels _____

Method obtained Fennel Level Date obtained October 1, 1986

Did it appear to be normal medium extreme do not know

Was highwater mark obtained from actual water, drift, local resident, U. S. Engineers, etc.? Actual water marks and residue.

Explanatory Remarks Water was 3.0 deep over top of the existing wood floor bridge. Note, this highwater is not backwater from the Fort Gibson Reservoir. This occurred after a 15" rain over the Ranger Creek watershed. The water washed out the approaches on each end of the bridge, but did not wash the structure away.

Location to be shown on back of this sheet as a check.

Field Note: To be sent to
