Survey Division  
Form No. 16  
Rev. Sept. 10, 1961

STATE OF OKLAHOMA  
DEPARTMENT OF HIGHWAYS  
SURVEY DIVISION

FLOOD INFORMATION FORM

To be used in obtaining and transmitting flood water elevations for Survey Division office record files. This information to be obtained by all Chiefs of Party or others in their vicinity in times of unusual high water, or at any time available from a reliable source. The elevations can be recorded by level reading, by measurement from bridge floor, in relation to a house, above roadbed or any other dependable, clear manner that fits the situation, the highest order possible to be used. Separate report to be made on each crossing or place obtained.

County LeFlore Date highwater occurred May 13, 1968  
SH 112 - New Alignment - SWO 2681 (1)  
Highway number (Under Construction) Name of stream Poteau River

Direction and distance from nearest town, village or store Approximately 4 miles north east of Poteau on Alignment of SWO 2681 (1) - SH 112 - LeFlore County.

Section, Township and Range Section 6, T-7-N, R-26-E

Description of Location On alignment of SWO 2681 (1) at Sta. 641+00, northeast of river crossing, at center line survey. - This survey across the river is now under construction and the road fill is completed in this area. High water elevation obtained on east side of road fill.

Elevation 438.2 Feet Source of levels (From SWO 2681 (1) BM) Mean Sea Level "USC U'GS"

Method obtained Engin<sup>er</sup> Level Date obtained May 15, 1968

Did it appear to be  normal  medium  extreme  do not know

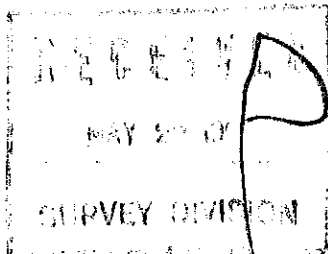

Was highwater mark obtained from actual water, drift, local resident, U. S. Engineers, etc.? Obtained by Moran and two members of this party. - Elevation obtained from silt marks on side of new road fill, east side, at Sta. 641+00.

Explanatory Remarks High water had subsided 4 feet at the time this highwater elevation was obtained. - High water caused from heavy rains in the Cavalal Mountain Range and the town of Poteau area. - The rain guage located at the State Highway Dept. Maintenance Office at Poteau measured 7.85 inches during the period of May 13th & 14th, 1968. The town of Wister was under water the night of May 13, 68, however there was no major flooding at the town of Poteau. ( See SD Form No. 16, dated May 23, 68 for flood information on Wister)

*This is a very fine report. (Stamp)*

Location to be shown on back of this sheet as a check.

Field Note: To be sent to Survey Engineer.
