SURVEY DIVISION
FLOOD INFORMATION FORM

Survey Division
Form No. 16
Rev. Sept. 10, 1961

To be used in obtaining and transmitting flood water elevations for Survey Division office record files. This information to be obtained by all Chiefs of Party or others in their vicinity in times of unusual high water, or at any time available from a reliable source. The elevations can be recorded by level reading, by measurement from bridge floor, in relation to a house, above roadbed or any other dependable, clear manner that fits the situation, the highest order possible to be used. Separate report to be made on each crossing or place obtained.

County LeFlore Date highwater occurred May 13, 1968 (10:00 PM)
Intersection of Plum St. & Choctaw Ave. in Wister
Highway number Name of stream Mountain Creek

Direction and distance from nearest town, village or store In Wister, Oklahoma

Section, Township and Range Section 25, T-6-N, R-24-E

Description of Location Intersection of Plum St. & Choctaw Ave. in Wister.

Elevation 483.2 Feet Mean Sea Level "USC & GS"
Source of levels (Taken from SWO 2537 (1))

Method obtained Engineers Eye Level Date obtained May 15, 1968

Did it appear to be normal medium extreme do not know

Was highwater mark obtained from actual water, drift, local resident, U. S. Engineers, etc.? Elevation obtained by Moran & two members of this party from actual water marks on the south side of the First National Bank Building at the N.E. corner of intersection of Plum St. & Choctaw Ave. in Wister.

Explanatory Remarks Flash flood caused from heavy rains near the upper Cavanal Mountain Range. - The Rain Gauge located at the State Highway Department Maintenance Office at Poteau measured 7.85 inches of rain which fell during the period of May 13th & 14th, 1968.

(For additional High Water elevations in the Wister Town area see map on back)

Location to be shown on back of this sheet as a check.
