FLOOD INFORMATION FORM

Plans & Survey Dept.
Form No. 16
Rev. July 10, 1947

SEP 29 1959

PLANS & SURVEY
DEPARTMENT

To be used in obtaining and transmitting flood water elevations for Plans & Survey office record files. This information to be obtained by all Chiefs of Party in their vicinity in times of unusual high water, or at any time available from a reliable source. The elevations can be recorded by level reading, by measurement from bridge floor, in relation to a house, above roadbed or any other dependable, clear manner that fits the situation, the highest order possible to be used. Separate report to be made on each crossing or place obtained.

County Logan Date highwater occurred Sept. 25, 1959

Highway number SH 33 Name of stream Cimarron River

Direction and distance from nearest town, village or store Approx 0.9 miles north of Coyle, Okla. on SH 33.

Section, Township and Range In Section 7, T17N, R1W

Description of Location On the south end of the bridge over the Cimarron River about 0.9 miles north of Coyle on SH 33.

Method obtained Hand Level

Elevation Down 6.8 from the bridge seat on the South end of the Bridge
~~Source of elevations~~

Was highwater mark obtained from actual water, drift, local resident, U. S. Engineers, etc? From water marks and drift.

Explanatory Remarks This is not an extreme high water I am sure but it caused some flooding.

Location to be shown on back of this sheet as a check.

Field Note: To be sent to Engr.
of Plans & Survey (1 copy).
Office Note: To be filed in Flood
Information by Counties.
