

STATE OF OKLAHOMA
DEPARTMENT OF HIGHWAYS
SURVEY DIVISION

FLOOD INFORMATION FORM

To be used in obtaining and transmitting flood water elevations for Survey Division office record files. This information to be obtained by all Chiefs of Party or others in their vicinity in times of unusual high water, or at any time available from a reliable source. The elevations can be recorded by level reading, by measurement from bridge floor, in relation to a house, above roadbed or any other dependable, clear manner that fits the situation, the highest order possible to be used. Separate report to be made on each crossing or place obtained.

County _____ Major _____ Date highwater occurred 8/31/66

Highway number SH 8 Name of stream Tributary of Deep Creek

Direction and distance from nearest town, village or store Approximately 6° Mi.
North of Okeene.

Section, Township and Range S. E. Corner Section 13T20N R11W

Description of Location At Section Corner Station 316+12.5 SAP 93(4).

Elevation R/W Fence on right 1190.6 Source of levels M.S.L. SAP 93(4) Plan Datum
R/W Fence on Left 1190.2

Method obtained Hand Level Date obtained September 1, 1966

Did it appear to be normal medium extreme do not know

Was highwater mark obtained from actual water, drift, local resident, U. S. Engineers, etc.? Marks established were silt & trash on R/W Fences, very well defined.

Explanatory Remarks Flooding caused by heavy local rains in the watershed (8" to 10")
Flow in this area was from N.E. across cultivated fields, which suffered scour damage
from sheet flow. Information obtained by G. H. Stout. and O. C. Curnutt.

Location to be shown on back of this sheet as a check.

Field Note: To be sent to
