

STATE OF OKLAHOMA  
DEPARTMENT OF HIGHWAYS  
SURVEY DIVISION

FLOOD INFORMATION FORM

To be used in obtaining and transmitting flood water elevations for Survey Division office record files. This information to be obtained by all Chiefs of Party or others in their vicinity in times of unusual high water, or at any time available from a reliable source. The elevations can be recorded by level reading, by measurement from bridge floor, in relation to a house, above roadbed or any other dependable, clear manner that fits the situation, the highest order possible to be used. Separate report to be made on each crossing or place obtained.

Section, Township and Range Approximately 400' south of  $\frac{1}{4}$  corner between Section 13, T20N, R11W, Section 18, T20N, R10W.

Description of Location Approximately 400' south of  $\frac{1}{4}$  corner 1.5 miles North of Deep Creek.

Elevation Silt on Shoulder Left 1208.3 Source of levels M.S.L. SAP 934 Plan Datum.  
Silt on Shoulder Right 1205.8

Method obtained Hand Level Date obtained 9/1/66

Did it appear to be  normal  medium  extreme  do not know

Was highwater mark obtained from actual water, drift, local resident, U. S. Engineers, etc.? Mark established was well defined silt lines on shoulder & verified on wingwall on downstream side of box.

Explanatory Remarks This flooding was caused by heavy local flooding (8" to 10") box was adequate to handle flow. which actually cleaned silt out of barrels. Downstream channels have silted somewhat also. Information obtained by G. H. Stout and O. C. Curnutt

Location to be shown on back of this sheet as a check.
