

STATE OF OKLAHOMA  
DEPARTMENT OF HIGHWAYS  
PLANS AND SURVEY DEPARTMENT

FLOOD INFORMATION FORM

To be used in obtaining and transmitting flood water elevations for Plans & Survey office record files. This information to be obtained by all Chiefs of Party in their vicinity in times of unusual high water, or at any time available from a reliable source. The elevations can be recorded by level reading, by measurement from bridge floor, in relation to a house, above roadbed or any other dependable, clear manner that fits the situation, the highest order possible to be used. Separate report to be made on each crossing or place obtained.

County Mayes Date highwater occurred July 31, 1976  
Highway number US 69 Name of stream \_\_\_\_\_  
Direction and distance from nearest town, village or store In Pryor, Oklahoma  
Near S. 4th Street

Section, Township and Range \_\_\_\_\_

Description of Location \_\_\_\_\_

Method obtained Fennel Level

Elevation \_\_\_\_\_ Source of levels \_\_\_\_\_

Was highwater mark obtained from actual water, drift, local resident, U. S. Engineers, etc? Mark obtained from actual water marks on windows of businesses.

Explanatory Remarks Water elevation was taken at three different places (at Ford Co., At Yamana & at Gas & go). Elevation was same at all places. The people I talked to said they had 9 inches of rain that began at 3:30 PM and quit at 5:00PM. These same people were of the opinion that the railroad culvert was too small and caused the water to back up. The water got 5.33 higher than the N.W. Corner of the west headwall of culvert under US 69. This clvt. is at approx. sta 1276+ on US 69 Plans.

Location to be shown on back of this sheet as a check.

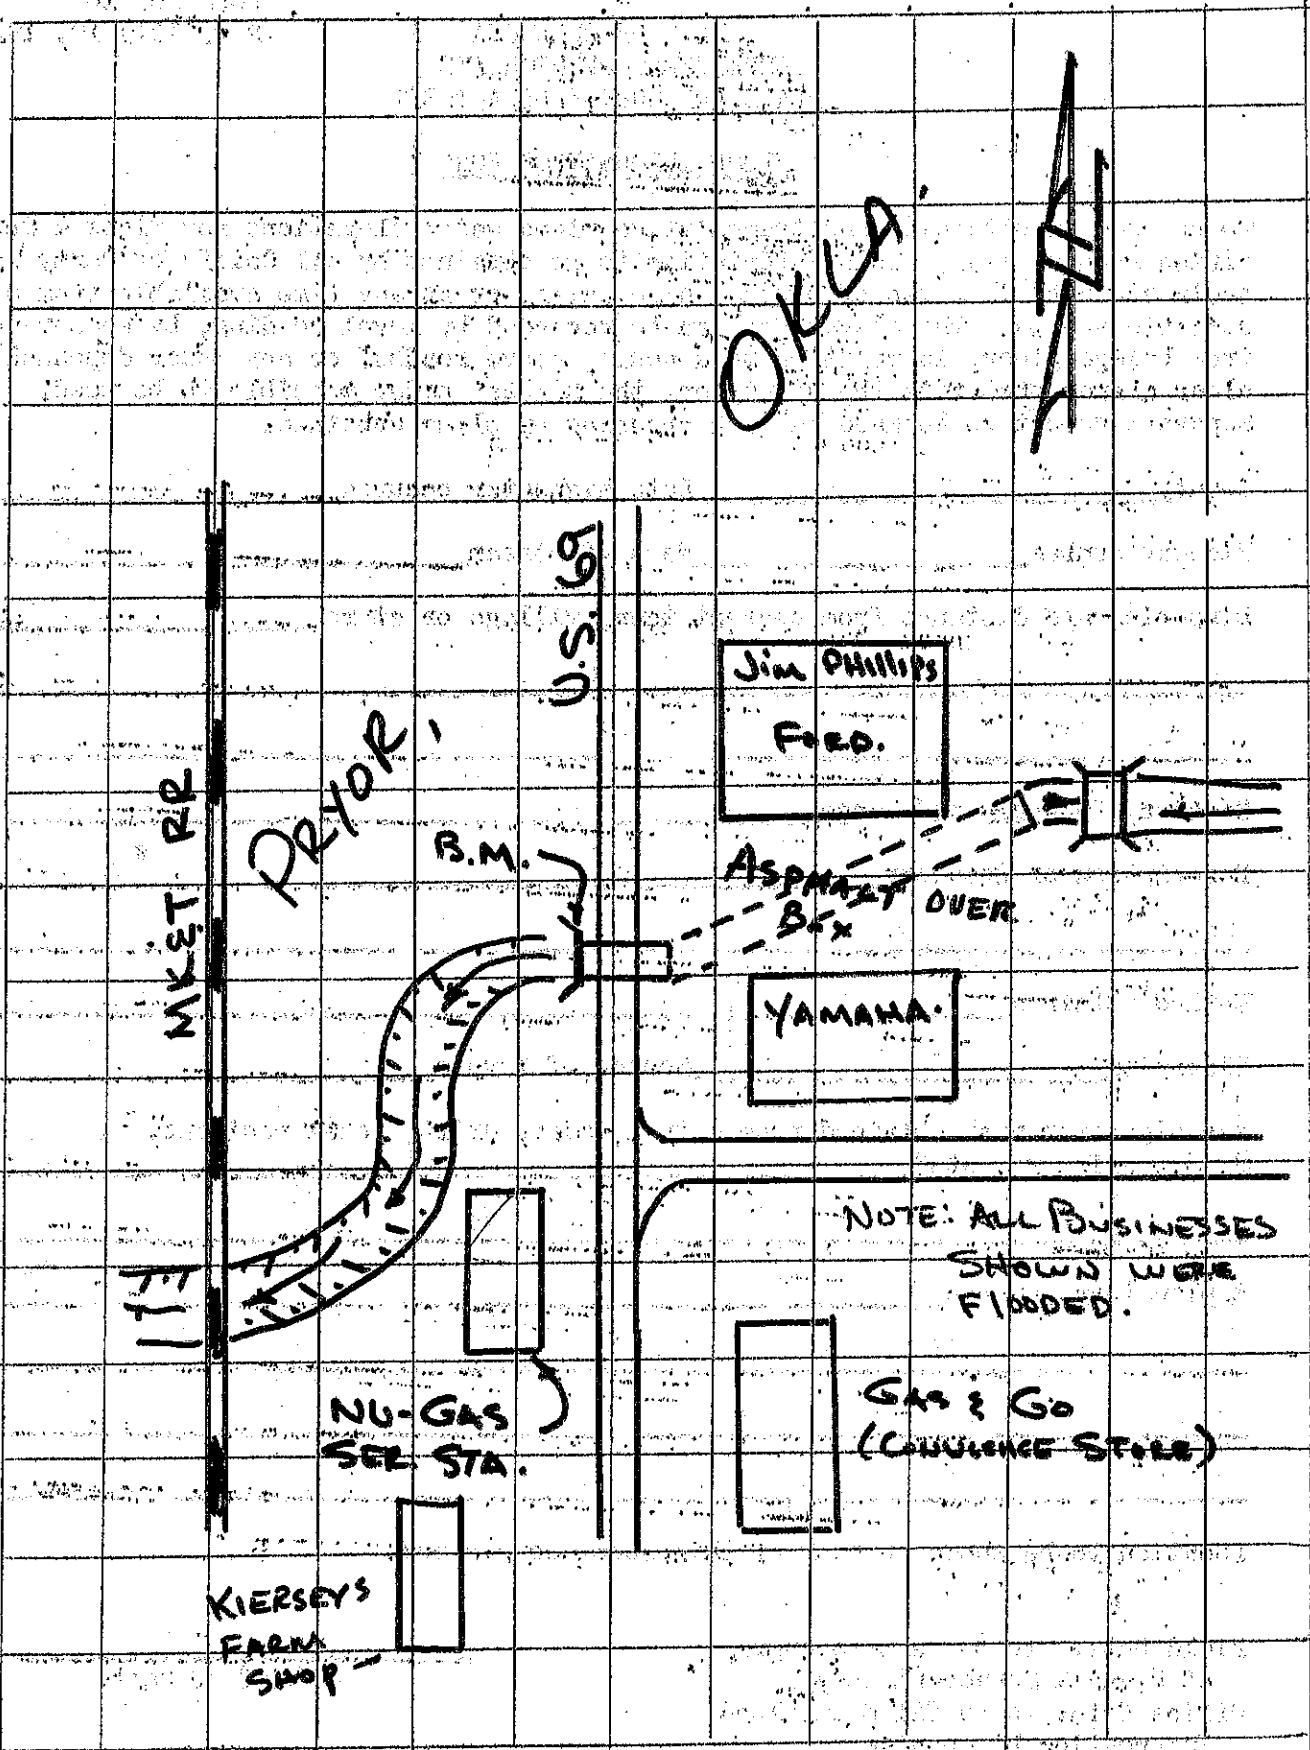

Field Note: To be sent to Engr.  
of Plans & Survey (1 copy).  
Office Note: To be filed in Flood  
Information by Counties.
