More than 2 inches of rain which fell within an hour and a half late Saturday night had the town of Boise City, Okla., awash by midnight. At left, Robert Young wades in to inspect dam-

age to the Cimarron County Abstract Company building. Right, high water failed to wash into these buildings, but parked cars mostly stayed parked till the water receded. Rains which

slacked off at midnight Saturday got a new start Sunday morning, and another inch and a half of rain fell that day. Moisture total at Boise City for the month: 5:02 inches.
