PLANS AND SURVEY DEPARTMENT

FLOOD INFORMATION FORM

To be used in obtaining and transmitting flood water elevations for Plans & Survey office record files. This information to be obtained by all Chiefs of Party in their vicinity in times of unusual high water, or at any time available from a reliable source. The elevations can be recorded by level reading, by measurement from bridge floor, in relation to a house, above roadbed or any other dependable, clear manner that fits the situation, the highest order possible to be used. Separate report to be made on each crossing or place obtained.

County Noble Date highwater occurred October 2, 1959

Highway number US 77 Name of stream Black Bear Creek

Direction and distance from nearest town, village or store Approx 3 miles north of Perry.

Section, Township and Range Between Sections 34 & 35, T22N, RLW

Description of Location At Black Bear Creek Bridge on US 77 Highway north of Perry

Method obtained Cloth Tape measured up from bridge seat.

Elevation Up 3.5 ft. from South Bridge Seat of Black Bear Creek Bridge
~~Source of elevation~~

Was highwater mark obtained from actual water, drift, local resident, U. S. Engineers, etc? From water marks on bridge and drift

Explanatory Remarks Water flooding across road stopped traffic for some time.
Local resident said highwater had reached approximately this elevation in the past but had never gone much higher.

Location to be shown on back of this sheet as a check.

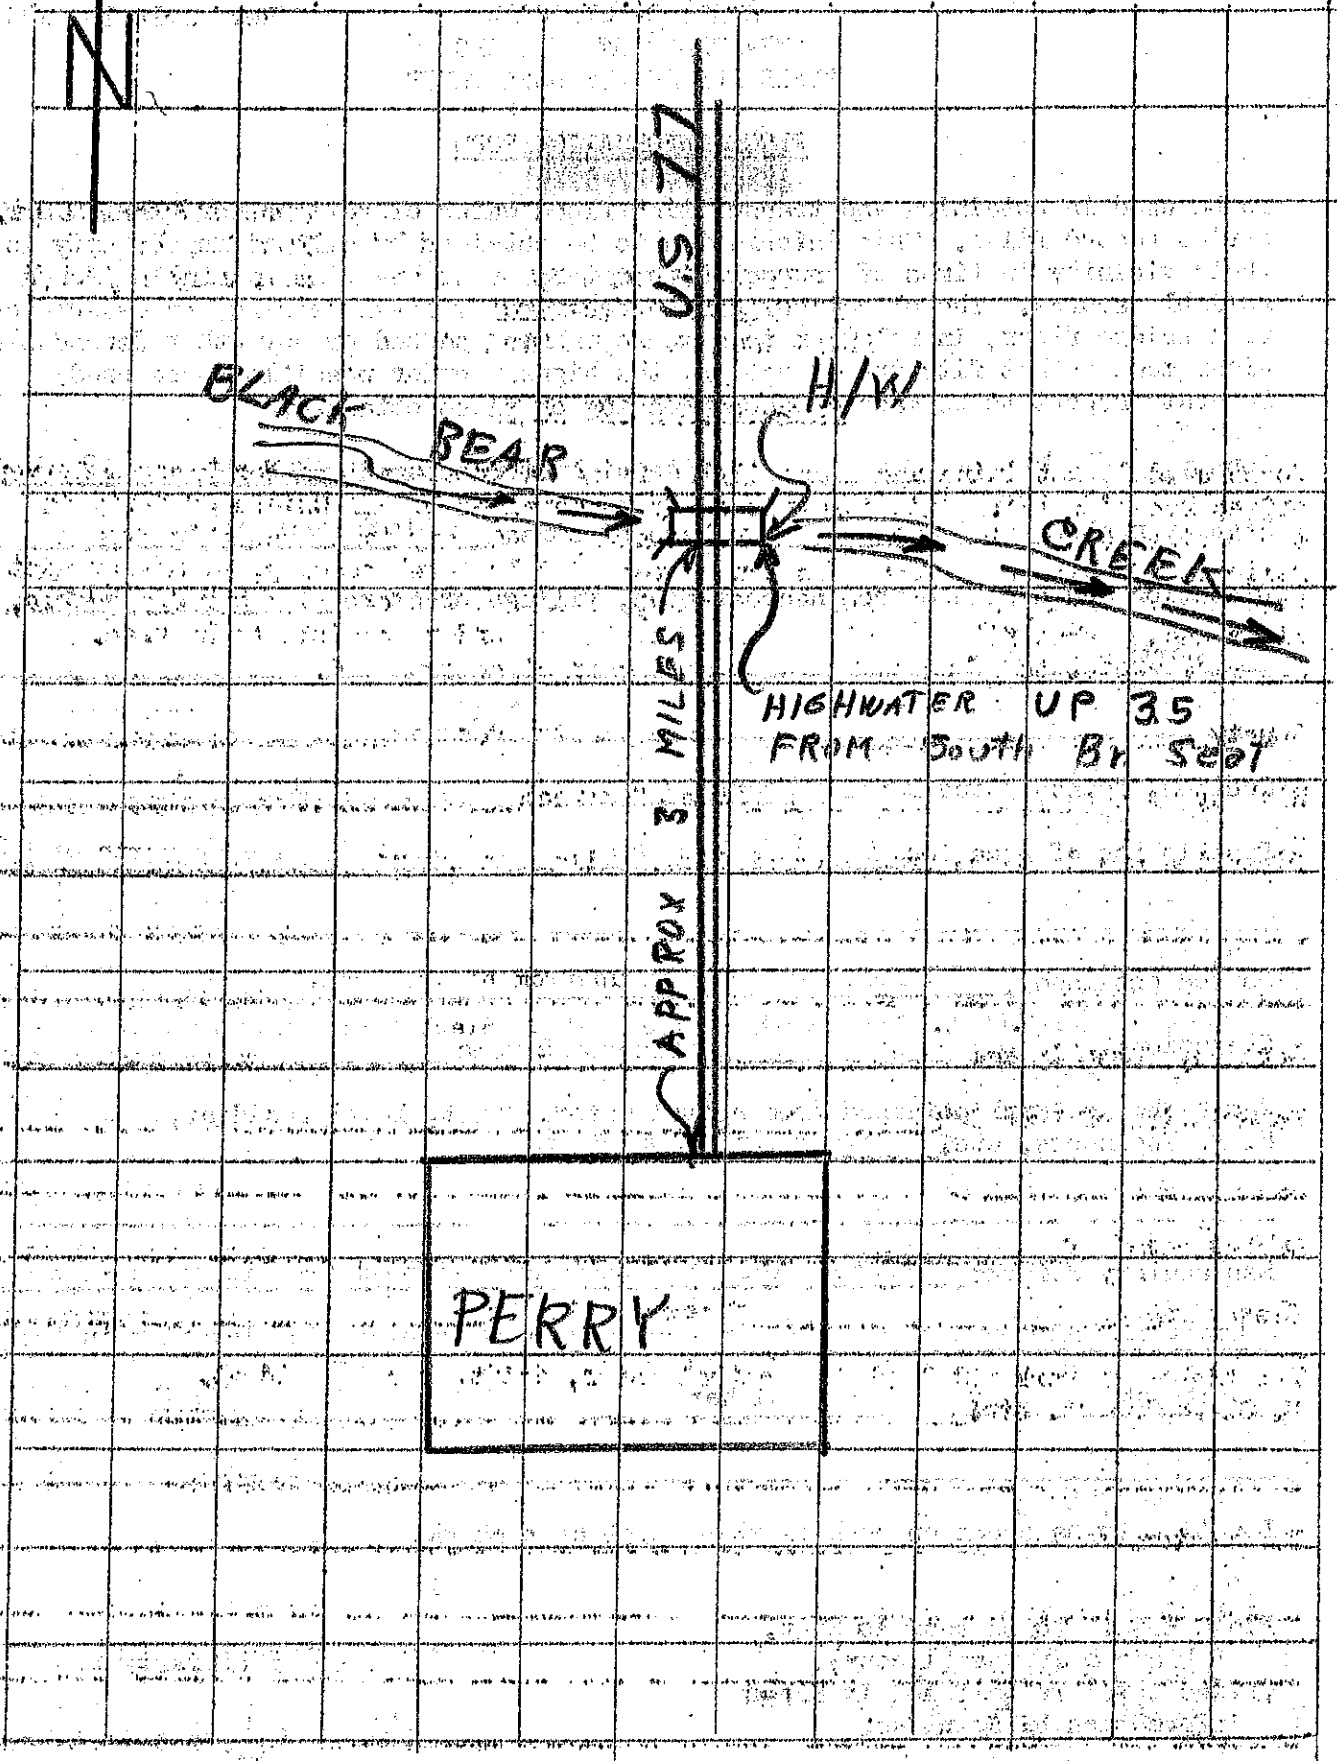

Field Note: To be sent to Engr. of Plans & Survey (1 copy).
Office Note: To be filed in Flood Information by Counties.
