Form No. 16
Rev. Sept. 10, 1961

FLOOD INFORMATION FORM

To be used in obtaining and transmitting flood water elevations for Survey Division office record files. This information to be obtained by all Chiefs of Party or others in their vicinity in times of unusual high water, or at any time available from a reliable source. The elevations can be recorded by level reading, by measurement from bridge floor, in relation to a house, above roadbed or any other dependable, clear manner that fits the situation, the highest order possible to be used. Separate report to be made on each crossing or place obtained.

County Nowata Date highwater occurred July 3, 1976

Highway number SH 10 Name of stream Verdigris River

Direction and distance from nearest town, village or store Approximate 2.5 miles east of Lenapah.

Section, Township and Range Section 3, T-27-N, R-16-E.

Description of Location At the present bridge in place.

Elevation 683.4 Ft. Source of levels Mean Sea Level "USC&GS"

Method obtained Wye Level Date obtained July 8, 1976

Did it appear to be ☐ normal ☐ medium ☒ extreme ☐ do not know

Was highwater mark obtained from actual water, drift, local resident, U. S. Engineers, etc.? From drift and silt marks on surrounding topography.

Explanatory Remarks High water covered the road both east and west of the bridge. SH 10 was closed to traffic from July 3rd to July 8th AM, 1976 due to high water. The Oologah Dam gates were also closed during part of this time which also held water back.

Location to be shown on back of this sheet as a check.
