PLANS & SURVEY
DEPARTMENT

To be used in obtaining and transmitting flood water elevations for Plans & Survey office record files. This information to be obtained by all Chiefs of Party in their vicinity in times of unusual high water, or at any time available from a reliable source. The elevations can be recorded by level reading, by measurement from bridge floor, in relation to a house, above roadbed or any other dependable, clear manner that fits the situation, the highest order possible to be used. Separate report to be made on each crossing or place obtained.

County Payne Date highwater occurred Sept. 25, 1959

Highway number SH 51 Name of stream Cow Creek

Direction and distance from nearest town, village or store Approx 1/4 mile west of the west edge of the town of Stillwater, Okla.

Section, Township and Range Between Sections 16 & 21, T19N, R2E

Description of Location At the bridge over Cow Creek on SH 51 just west of the west edge of Stillwater, Okla.

Method obtained By Hand Level

Elevation Down 7.1 from Bridge Seat on East End of Bridge.
~~Source of Elevation~~

Was highwater mark obtained from actual water, drift, local resident, U. S. Engineers, etc? From Drift and Water Marks.

Explanatory Remarks This is not an extreme high water and the high water was down 2.1 Ft. from the east Bridge Seat in about June of 1959. The high water mark from this earlier high water was still plainly visible on the bridge.

Location to be shown on back of this sheet as a check.

Field Note: To be sent to Engr. of Plans & Survey (1 copy).
Office Note: To be filed in Flood Information by Counties.
