

Oklahoma Dept. of Transportation

Date June 23, 1980

To Mr. Richard L. Shephard, Survey Engineer
From Jerry Wayne Haynes, Location Engineer
Subject Highwater - June 19, 1980 in vicinity of
Coweta and Broken Arrow (SWO 3298(1) & SWO 3428(1))

1. During the night of June 18 - 19, 1980, extremely heavy rains which fell on thoroughly saturated land caused quite extensive damage in the Coweta - Broken Arrow area. I obtained highwater information on Coweta Creek on SH 72 at the south edge of Coweta and have submitted this information on a SD Form No. 16.
2. I also obtained high water information on SH 51 between Coweta and Broken Arrow which was covered by SWO 3428(1). Also on 71st Street in Broken Arrow which was covered by SWO 3298(1) highwater was obtained on Adams Creek.
3. I plan to insert this information into the proper books during my visit to Survey Engineer's Office on June 30, 1980.

Jerry Wayne Haynes
