

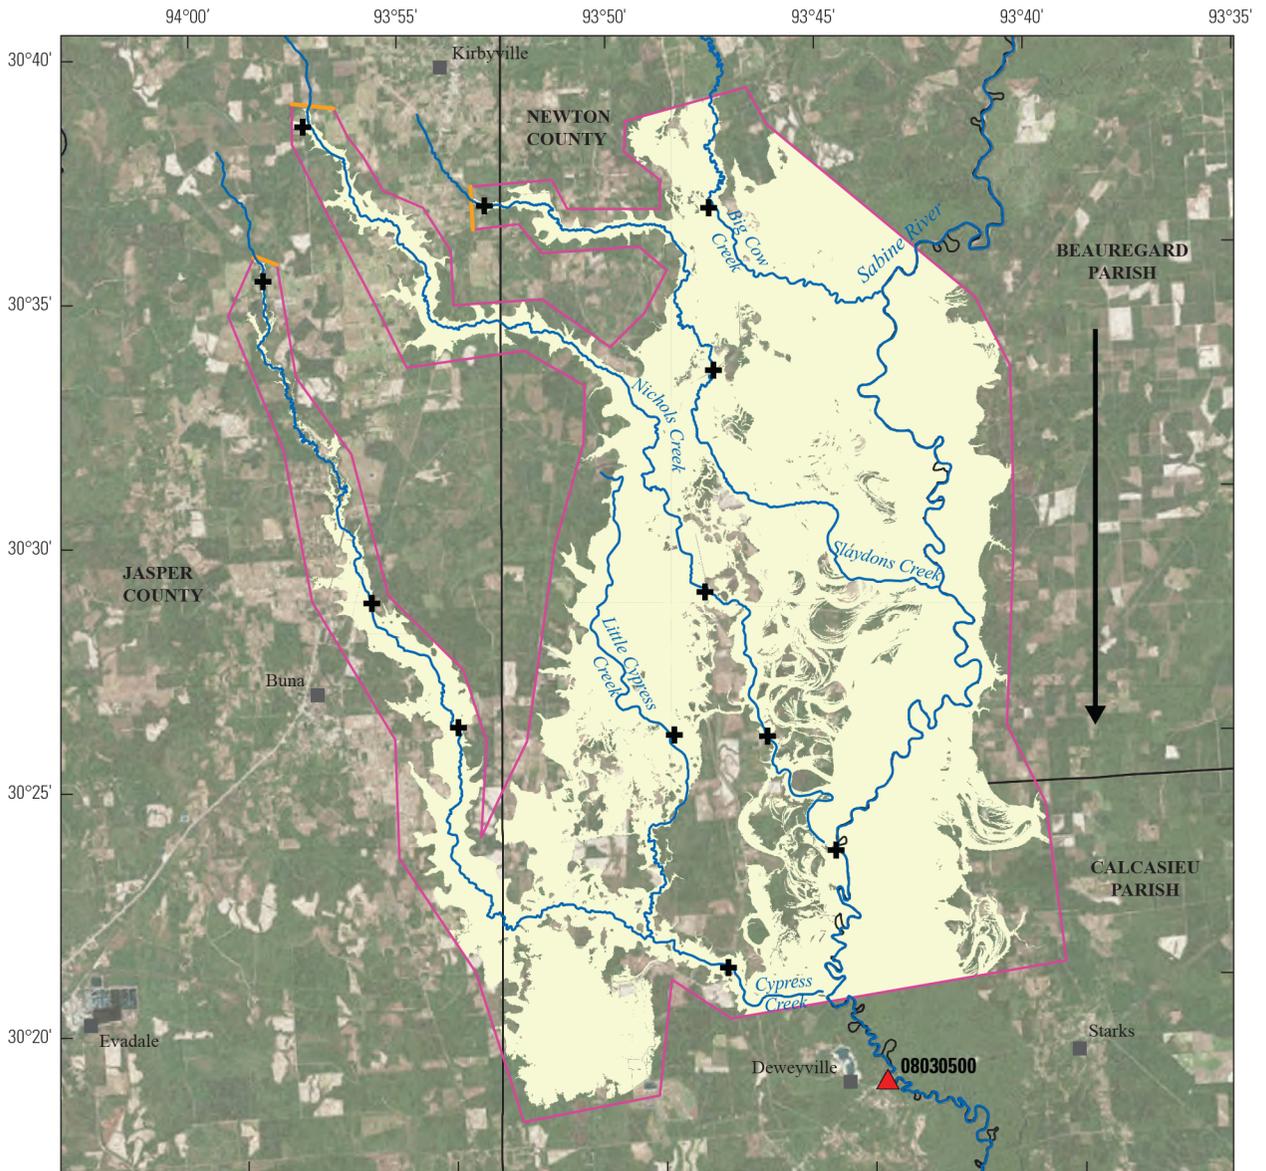

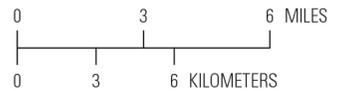

Figure 10 from USGS Scientific Investigations Report 2018-5070.

Base modified from U.S. Geological Survey digital data
 Hydrography and inundated area 1:24,000 scale
 Imagery from: Esri World Image Service
 Albers Equal Area Projection, Texas Centric Mapping System
 North American Datum of 1983 (2011)

EXPLANATION

- Inundated area, derived from high-water mark water-surface elevation and streamflow-gaging station data
- Mapped boundary
- Flow direction
- Mapped area boundary—Restricted by high-water mark coverage
- + High-water mark
- U.S. Geological Survey streamflow-gaging station and number

Flood-inundation map of the middle reach of the Sabine River for the August and September 2017 Hurricane Harvey-related flood event in southeastern Texas and southwestern Louisiana.
